HUNTING AND HARVEST REPORT

PREFACE

Survey Approach

Resident and nonresident elk license or permit holders were randomly sampled from a population of all resident and nonresident elk license or permit holders in our license database. Elk hunting and harvest data were acquired via telephone for resident license holders and via a mail survey for nonresidents.

Definitions

HUNTERS.....The number of hunters who hunted one or more days
HUNTER DAYS.....Sum of whole days or portions of days hunted
PERCENT SUCCESS.....The number of successful hunters divided by the
total number of hunters and multiplied by 100
LOWER.....Lower confidence limit at a level of confidence of
80 percent
POINT.....The estimated value
UPPER.....Upper confidence limit at a level of confidence of
80 percent
GEN ELK.....An abbreviation for general elk license
GEN B10.....An abbreviation for general elk license included
in the nonresident B10 combination license
SP.....An abbreviation for special permit
UNKNOWN.....A hunting or kill category where the season type
was unknown or the activity illegal
UNKWN.....A symbol for unknown used to designate unknown sex
MISC. PERMITS.....See Explanations

Explanations

The elk hunting and harvest statistics are estimates made from a sample of 55,391 questionnaires representing about 43 percent of all elk license holders. Confidence-interval estimates are given for hunters, hunter days, and total harvest. Confidence intervals are given at the 80 percent confidence level, meaning that the actual value will be between the lower and upper limit in four out of five cases. The relative precision of the estimate increases with the size of the estimate. Regional estimates have greater relative precision than district estimates and the statewide estimates have the greatest relative precision.

All valid response data were used in the estimates even when some data fields were missing. This is the reason for the various unknown categories given in the report. The unknown license type given in the harvest sections is used to represent elk kills which could not be associated with a particular license/season type. Hunting or harvest activity in an unknown or invalid hunting district within a valid region is represented as "RXX" where R is the regional number 1 through 7. An unknown district in an unknown region is represented as "XXX". The unknown district or region activities are still incorporated into the regional or state totals respectively.

(CONTINUED)

There are two changes in the analysis and reporting methods this year compared to previous reports. One difference is that late season special permit holders were surveyed as part of the telephone survey with results given under the appropriate hunting district and permit as opposed to previous reports where only check station data were reported and were added at the end. The other change is the inclusion of a category called "MISC. PERMIT" at the end of the report. This category gives estimates of kills reported by special permit holders when the kill occurred outside of their permit district(s). Many of these kills were legal on their general elk license. These kills were not reported in earlier reports.

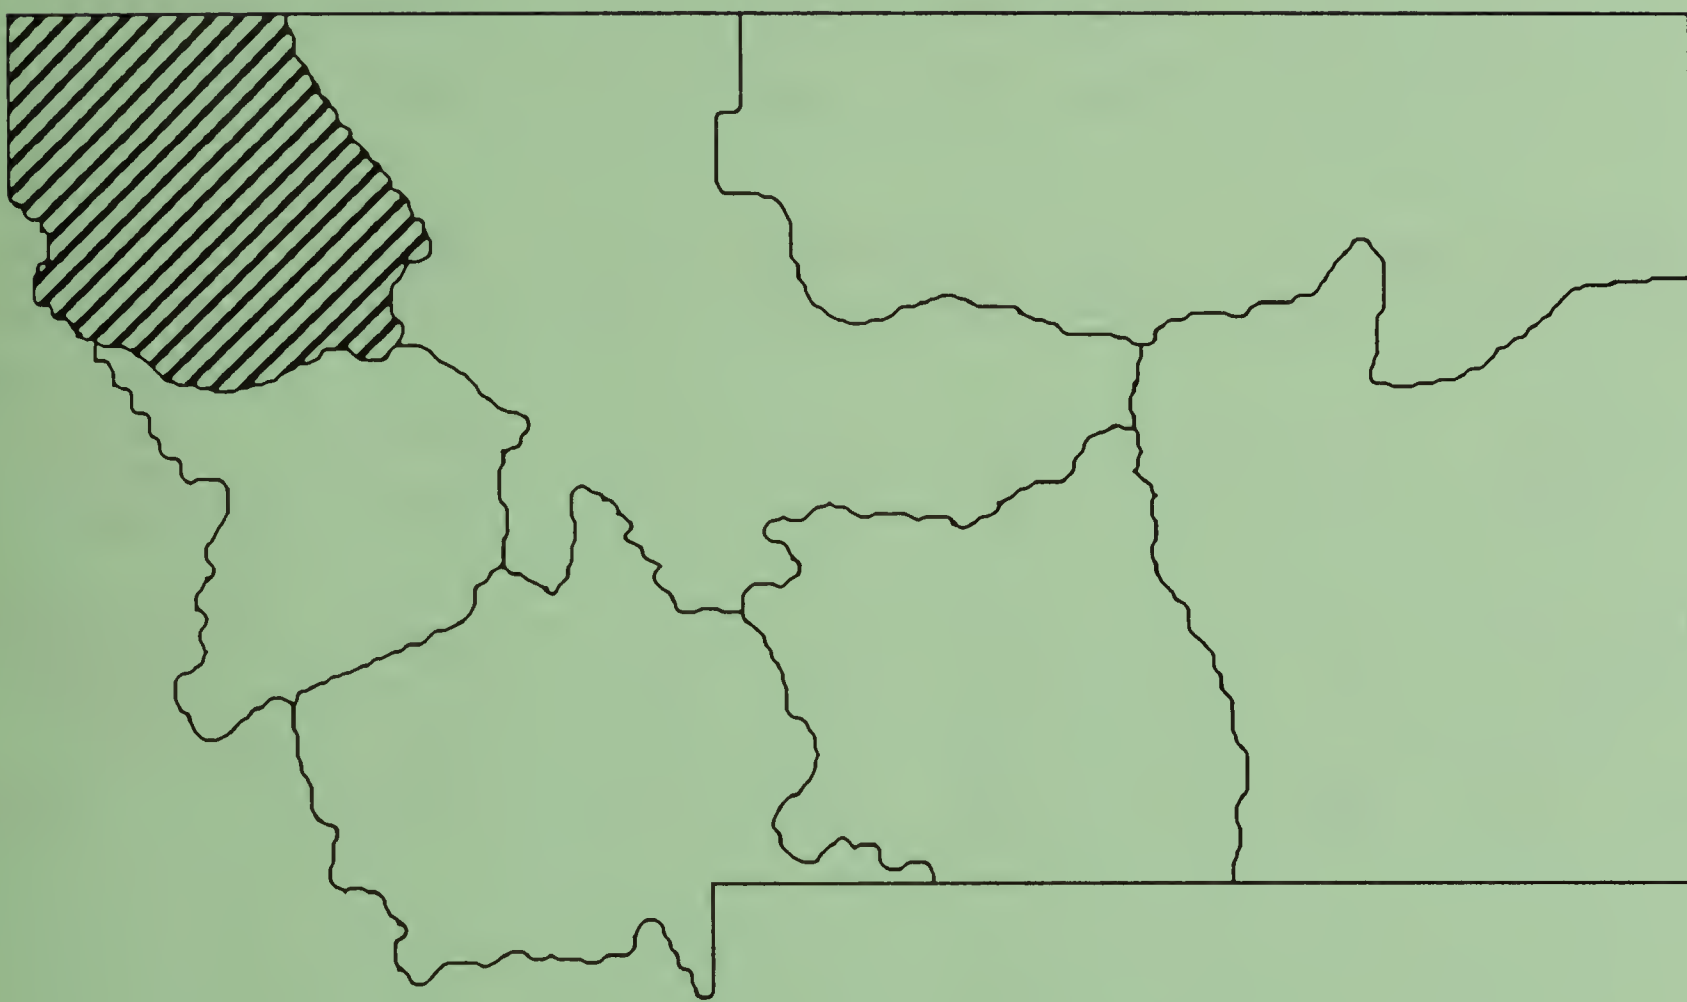

All estimates represented are rounded to the nearest whole number. It is for this reason that rows and columns do not always agree exactly with row or column totals given.

TIME PERIOD OF KILL REPORT

PREFACE

Survey Approach

Resident and nonresident elk license holders were randomly sampled from a population of all resident and nonresident elk license holders in our license database. Elk hunting and harvest data were acquired via telephone for resident license holders and via a mail survey for non-residents.

Definitions

UNKWN.....A symbol for unknown used to designate unknown time period of kill
GEN ELK.....An abbreviation for general elk license
GEN B10.....An abbreviation for nonresident Big Game Combination license type B10
SP.....An abbreviation for special permit preceeding the special permit district/option designation
SPECIAL.....Used in the regional or state summaries to designate combined special permits
UNKNOWN.....A license category where the license used to take the elk was unknown

Explanations

The elk time period of kill statistics are from a sample of 55,391 questionnaires representing about 43 percent of all elk license holders. No expansions or estimates are given. The percentages are from the actual sample data collected. Sample number killed in each license category is given on the right side of each page. To obtain estimates of the actual number killed in a given time period, the percentages can be applied to the kill statistics in the hunting and harvest section of this report.

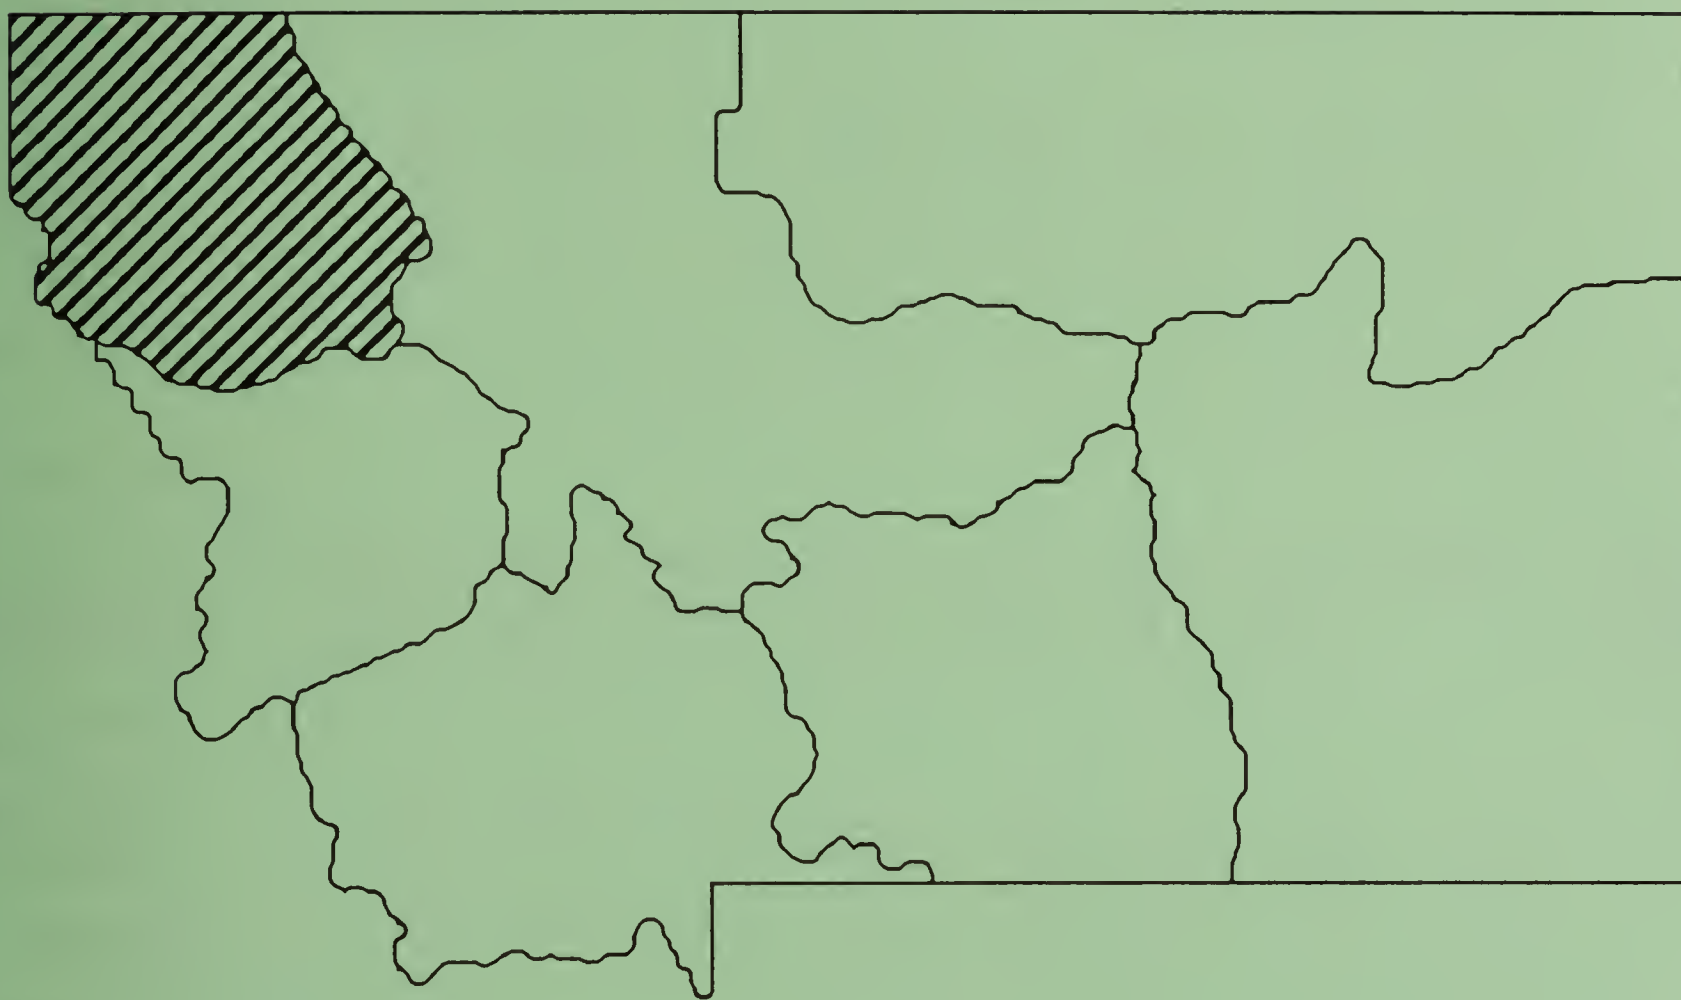

All valid response data were used in the analyses even when some data fields were missing. This is the reason for the various unknown categories given in the report. The unknown license type is used to represent elk kills which could not be associated with a particular license/season type. Kills in an unknown or invalid hunting district within a valid region are represented as "RXX" where R is the regional number 1 through 7. An unknown district in an unknown region is represented as "XXX". The unknown district or region kills are still incorporated into the regional or state totals respectively.

ANTLER STATISTICS

PREFACE

Survey Approach

Resident and nonresident elk license holders were randomly sampled from a population of all resident and nonresident elk license holders in our license database. Elk hunting and harvest data were acquired via telephone for resident license holders and via a mail survey for non-residents.

Definitions

ANTLER TYPE...The number of points on each side
FREQUENCY.....The number of occurrences of the given antler type in the
 given hunting unit within the sample data obtained
PERCENT.....The percentage of the total represented by each frequency

Explanations

The elk antler point statistics are from a sample of 55,391 questionnaires representing about 43 percent of all elk license holders. No expansions or estimates are given. The frequencies and percentages are from the actual sample data collected for antlered elk. Total sample number killed in each hunting unit is given at the bottom of the frequency column. To obtain estimates of the actual number killed with a particular antler point count the percentages can be applied to the kill statistics for bulls in the hunting and harvest section of this report.

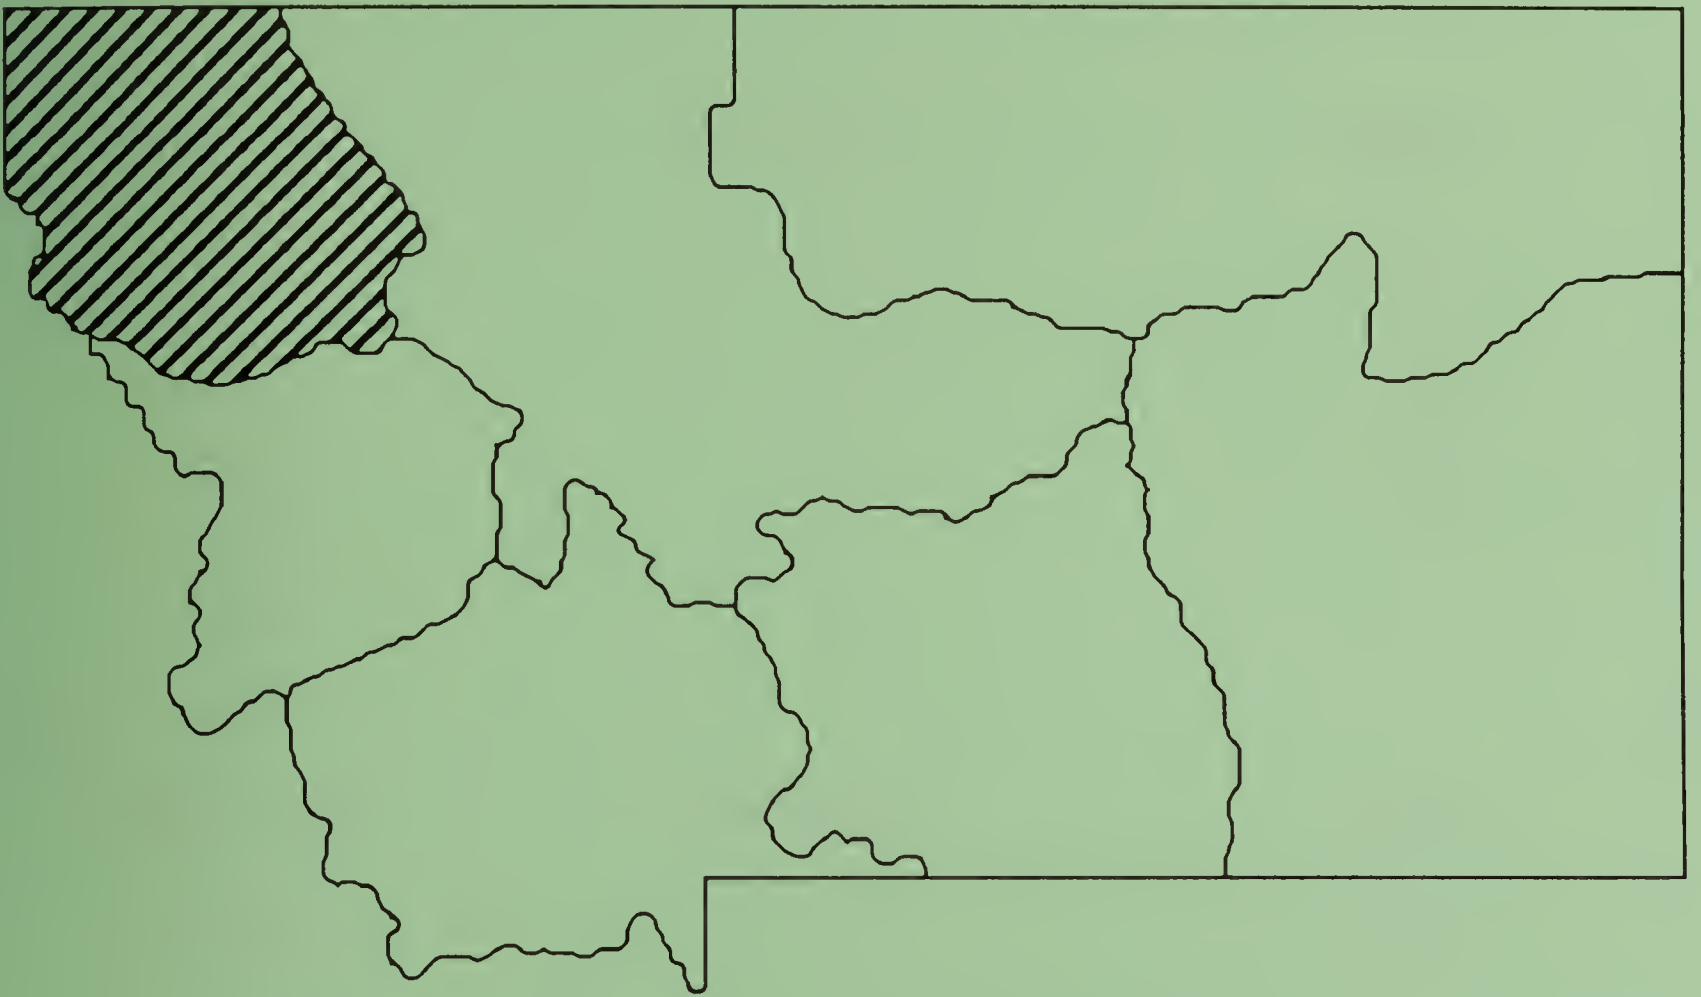

All valid response data were used in the analyses even when some data fields were missing. This is the reason for the unknown hunting unit categories given in the report. Kills in an unknown or invalid hunting district within a valid region are represented as "RXX" where R is the regional number 1 through 7. An unknown district in an unknown region is represented as "XXX". The unknown district or region kills are still incorporated into the regional or state totals respectively.

BEAR, DEER, ELK, LION

LICENSES & GENERAL INFORMATION

GENERAL SEASONS

- Sportsmen may purchase only one black bear license per year. This is included in the resident Sportsman's License and the nonresident Big Game Combination License.
- Black bear licenses are available at all Fish, Wildlife and Parks offices and most license agents throughout the state.
- Sportsmen may legally take one black bear per license year. Female bears with young and individual cubs may not be harvested.

There are no baar harvest quotas/female sub-quotas in all 100-400 series black bear hunting districts. Baar harvest quotas/female sub-quotas do occur in the 500 series districts.

When the quota or sub-quota is reached in the hunting district(s) or groups, the bear season for that area will close upon 48 hours notice, but no later than last date of season shown in the regulations.

Any person taking a black bear in 500 series districts must report the kill within 48 hours to an official of the department in the administrative region where the kill was made, and must personally present the hide and skull within 10 days to an official of the department for purposes of inspection, recording sex and removing a tooth for aging. The hide and head must be retained even though damaged.

ARCHERY

- ARCHERY ONLY season is September 2 - October 15, 1989.
- All legally described black bear hunting districts are open to ARCHERY ONLY with the following exceptions noted on this page.
- Licenses are valid for either sex.
- Female bears with young and individual cubs may not be harvested.
- An archery stamp, plus the proper hunting license is required of all hunters during ARCHERY ONLY seasons.
- During any ARCHERY ONLY season, only a longbow, recurve bow or compound bow may be used. Arrows dipped in or containing any poisonous, explosive or deleterious substances are prohibited.
- Crossbows may not be used during ARCHERY ONLY seasons.

Exceptions to the standard archery regulations:

- There is no ARCHERY ONLY season in the 100, 200 (except 284), 400 and 500 series districts.
- Hunting district 316 open only during general deer/elk season (September 15 - November 26).
- Bear hunting not authorized in Gallatin Closed Area.
- 500 series districts—when the quota or subquota is reached in the hunting district(s) or groups, the bear season for that area will close upon 48 hours notice, but no later than last date of season shown in the regulations (see Black Bear "Gun Season").

Teton-Spring Creek Preserve - Archery only, Sept. 2-Dec. 31, either sex, either species by holders of deer A licenses and for antlerless whitetail by holders of over-the-counter whitetail B licenses. Special deer B licenses issued for the "gun" season in Hunting District 404 are valid in the preserve for ARCHERY ONLY antlerless whitetail from Sept. 2-Dec. 31. Difficult to obtain access on the Preserve.

LICENSES & GENERAL INFORMATION

- Sportsmen may purchase only one elk license per year, which is included in the resident Sportsman's License and the nonresident Big Game Combination License.
- Only nonresidents holding a Big Game Combination License may hunt elk.
- Sportsman harvesting an elk must, if required by the Department, physically return to the kill site for inspection and on demand show the complete head.
- Sportsmen may not hold both an A-5 elk license and an A-7 antlerless elk license. Holders of an A-7 license must hunt antlerless elk only in the designated area and may not hunt elk anywhere else in the state (bull or antlerless) in the 1989 season. If successful in drawing an A-7 license, the sportsman must obtain the A-7 license by Sept. 2, or forfeit the A-7 license. Only legal residents of Montana are eligible for A-7 licenses. If after obtaining the A-7 license the season in the designated area closes before there is an opportunity to hunt, a refund will be given and an A-5 license may be purchased.

Landowner Preference

- Montana landowners who qualify may receive preference in the elk permit and A-7 cow elk license special drawings to hunt on their own land. To qualify, the applicant must own 640 acres of contiguous land used by elk or where elk are known to occur at anytime during the year. If the permit is valid for a portion of the hunting district only, the landowner must own land within that portion. When applying landowner preference, the permit or A-7 cow elk license is valid only on land owned in fee title by the applicant within the hunting district applied for.
- Preference is available to resident and nonresident landowners and can be designated to a blood or marriage related individual or a person employed by the landowner. Only one person may use or designate preference in a partnership or corporation.

Elk Prerequisite

- Residents and nonresidents are required to purchase a general elk license prior to applying for a special elk permit. Applicants must list their 1989 general elk license number in the designated space on the 1989 special drawing application form, or their application will be eliminated from the elk special drawings.

Definitions

- Antlered Bull - any elk having an antler or antlers of at least four inches in length measured from the top of the skull.
- Antlerless - a female or juvenile male with antlers less than four inches in length measured from the top of the skull.

Montana has some elk hunting districts with special regulations governing the type of bull elk that is legal. The diagrams below are intended to assist the sportsmen in interpreting these special regulations.

SPIKE BULL

Spike Bull - any elk having antlers which do not branch, or if branching, branch is less than four inches long measured from the main antler.

BRANCH ANTLERED

Branch Antlered - any elk having an antler or antlers with a visible branching of one or more extensions from the main antler. An extension or branch on at least one side must be four inches in length or more measured from the main antler.

ANTLER POINT MEASUREMENT
(Legal antler point must be 4 inches or more in length.)

ARCHERY

- ARCHERY ONLY season is September 2 - October 15, 1989.
- All legally described elk hunting districts are open to ARCHERY ONLY hunting with exceptions noted on this page.
- Licenses are valid for either sex elk, unless specified otherwise.
- An archery stamp plus the proper hunting license are required of all sportsmen during ARCHERY ONLY seasons.
- During any ARCHERY ONLY season, only a longbow, recurve bow or compound bow may be used. Arrows dipped in or containing any poisonous, explosive or deleterious substances are prohibited.
- Crossbows may not be used during ARCHERY ONLY seasons.
- It is illegal to use any livestock to kill, take, attempt to take, or harass elk during the elk archery season. This shall not prohibit the use of livestock to get to the hunting area or to remove downed game animals.

Exceptions to the standard archery regulations by hunting district or area:

150	Sept. 2 - Sept. 14	either sex elk
151	Sept. 2 - Sept. 14	either sex elk
280	Sept. 2 - Sept. 14	antlerless elk or branch-antlered bull only
310	During the late Gallatin Hunt (Dec. 8 - Jan. 29, 1989), sportsmen possessing an unused elk license and a 1989 archery stamp, may check in at the Gallatin Check Station and receive a special, free permit to hunt either sex elk in the north half of the Porcupine Drainage. Regulations and a map of the area will be given to sportsmen at that time. The season may close on a 48-hours notice.	
316	Closed to ARCHERY ONLY prior to September 15	
380	Antlerless or spike bull elk. (If branching does occur on either antler, the branch cannot exceed four inches in length from the main antler beam and still be considered a spike bull.) EXCEPT holders of a valid branch-antlered permit for hunting district 380 may harvest either an antlerless elk, spike bull or a branch-antlered bull.	

Archery hunting for branch-antlered bulls or antlerless elk only in the following hunting districts: 215, 280, 281, 301, 302, 310, 311, 318, 319, 320, 322, 323, 324, 325, 326, 327, 330, 333, 340, 341, 350, 360, 361, 362, 370 and that portion of hunting district 520 between West Fork Rock Creek and the Stillwater River. Spike bulls may not be taken in these districts.

621, 622, 623, 631, and 632 will be by special permit only. Sportsmen must apply for these permits no later than June 1 on the special drawing application. In hunting districts 631 and 632, a limited number of permits will be issued, and must be applied for as one of your special elk permit district choices on the special drawing application.

In 621, 622, and 623 an unlimited number of elk ARCHERY ONLY permits will be issued. Applicants should apply using hunting districts 621-05, 622-05 or 623-05 (select one only) as their first and only choice. If a district with a limited permit quota is listed as the first choice and a district with an unlimited permit quota is listed as the second or third choice, the unlimited permit quota district choice will be eliminated.

Elk archers in hunting district 410, 621 and 623 may hunt on islands in the Missouri River adjacent to the elk hunting district where their ARCHERY ONLY elk permit is valid.

There shall be no ARCHERY ONLY season in the following hunting districts: 316, 500, 502, 510, 570, 575, 600, 610, 611, 620, 630, 633, 640, 641, 650, 651, 670, 680, 690 and hunting districts beginning with 7 except hunting district 700.

The First 100 Years

1872

The headlong slaughter of buffalo for their hides and tongues, the booming trade in elk and deer hides and the uncontrolled killing of moose, antelope, mountain goat and bighorn sheep had led to the near extinction of these species. Realizing that action needed to be taken, the Territorial Legislature enacted a law closing the hunting season on those species from February 1 through August 15 each year.

1895

In its sixth year of statehood, the state of Montana set its first bag limits on big game to further reduce the perilous declines of several species. Hunters were limited to taking eight deer, eight bighorn sheep, eight mountain goats, eight antelope, two moose and two elk each year. Big game could only be hunted between September 1 and January 1.

1897

The virtual extinction of the moose from the state prompted the legislature to prohibit all moose hunting in Montana. Those that remained were limited, almost entirely, to the confines of Yellowstone National Park. The season remained closed until 1945 when increases in populations indicated that hunting regulated by modern game management principles, could be resumed in portions of Park, Gallatin, Madison, and Beaverhead counties.

1901

To allow recovery of game populations, the Montana Legislature realized that enforcement of fish and game laws was necessary. The first State Game Warden, W.F. Scott, was hired by the governor in 1901 and the state's first Fish and Game Department was organized. The State Game Warden was assisted by eight deputy game wardens located throughout the state. These wardens were the department's first and, at the time, only employees. Montana's first wildlife manager was not hired until 1940, when the need for scientifically trained people in animal biology and habitat management was first recognized.

1905

To pay for increased law enforcement needs, the legislature in 1905 established Montana's first hunting and fishing license. The cost of this license, which was valid for the hunter and his entire family, was \$1.00 per year. A separate big game hunting license was established in 1931. For the \$1.00 cost for this license, hunters could take legal limits of deer and elk. The cost of this license was increased to \$2.00 in 1947.

1910

At the turn of the century, less than 20,000 elk were thought to inhabit the nation and the vast majority of these lived in and around Yellowstone National Park. In 1910, for the first time, elk were trapped in the park and transplanted to the Fleece Mountains of southwestern Montana in an attempt to establish a new herd. As a result of effective wildlife management, including the transplanting of elk to the Missouri River Breaks region of northeastern Montana in 1957, elk now inhabit much of their historical Montana range.

1915

The journals of Lewis and Clark noted Rocky Mountain bighorn sheep throughout the area that is now Montana. The bighorns in the lower Missouri and Yellowstone River Breaks regions were later classified as the Audubon subspecies. Though they were numerous in the area during the early 1900s, wild sheep populations decreased markedly due to range competition with in-coming herds of domestic livestock, contraction of diseases from domestic sheep and meat hunting by early settlers. Due to these declines, the season for hunting bighorns was closed in 1915 and did not reopen until 1953. As a result of modern wildlife management, which included trapping and transplanting efforts, nearly 4,700 bighorns are now estimated to live among the 33 distinct herds throughout the state and bighorns are once more roaming their historical lower Missouri Breaks range. Annually, many of the continent's finest trophy bighorn rams are taken in Montana.

1925

In 1925 the number of pronghorn antelope in all of Montana was estimated at about 3,000. Today, approximately 160,000 of these prairie speedsters inhabit the state. In 1935, for the first time, hunters in Carter and Powder River counties could hunt antelope only with a permit. In 1989, in those same counties, anyone that wants an antelope license can obtain at least one.

1926

In 1926, the state acquired 27 acres of land at Red Rock Lakes in Beaverhead County. The move represented the first such acquisition of land primarily for the purpose of wildlife management. Although other small tracts of land were acquired in the intervening years, the department's structured land acquisition program effectively began in 1940 with the purchase of the Setter property on the banks of the Judith River near Utica as winter range for elk. Since the purchase of the Judith River Game Range, Montana's first wildlife management area, over 303,000 acres of Montana have been acquired for their wildlife values, solely with sportsmen's dollars.

1941

With passage of the Pittman-Robertson Federal Aid in Wildlife Restoration Act in 1937, federal monies derived from excise taxes on hunting arms and ammunition became available to the states for use in their wildlife management efforts. In 1941, following the Montana Fish and Game Commission's adoption of a policy stating that all future wildlife management would be performed on a scientific basis, the department initiated its first big game and upland game bird population surveys with money provided through Pittman-Robertson funding.

1957

Populations of both mule deer and white-tailed deer were part of Montana's wildlife scene at the time of the earliest explorers and played an important role in the early development of Montana. They were a staple diet for most early explorers, trappers, miners, loggers and railroad crews, and in northwestern Montana between 1893 and 1900 deer hides were considered legal tender worth 50 cents each.

Mule deer numbers have fluctuated considerably throughout this century. Researchers are now finding that mule deer population levels do fluctuate in response to weather patterns and range conditions. Mule deer numbers "bottomed-out" in early 1970s due to a combination of low numbers of fawns and poor over winter survival. Mule deer populations have rebounded and are now being sustained at healthy levels.

White-tailed deer have continued to increase their range and numbers in Montana over the last several decades. A chronic problem in managing Montana's whitetails has been obtaining an adequate harvest, especially in areas with rugged terrain and on private lands where hunting is restricted but where the deer can cause damage to haystacks and other agricultural crops.

Recent annual harvest of both species have already met or are approaching all-time highs.

1970

Since its birth in 1970, Montana Outdoors magazine has evolved into one of the nation's finest state resource agency periodicals. A winner of several national awards, Montana Outdoors now is sent to over 35,000 subscribers and enjoyed by over 100,000 readers every other month. The magazine's annual January/February "Special Photo Issue" remains a favorite among both readers and magazine collectors.

1987

With the passage of House Bill 526 by the 1987 Montana Legislature, Montana embarked upon one of the most ambitious state-administered wildlife habitat protection programs in the nation. The bill's passage raised fees for certain hunting and fishing licenses and earmarked the revenues gained through these increases for acquisition of important wildlife habitat through easements, leases or purchase. The success of HB 526 was particularly notable because it brought together Montana's agricultural community, the Montana Wildlife Federation, sportsman's clubs, private conservation organizations and the Department of Fish, Wildlife and Parks for the benefit of the state's wildlife.

Montanans enjoy a wild legacy as magnificent as any in the world. If we are to maintain this legacy and ensure that the state's wildlife resources will play as significant a role in Montana 100 years from now as it does today, we must all make an effort to provide for the needs of and encourage the wise use of this priceless resource.

Looking Toward Montana's Bicentennial

The Second 100 Years

For the first time in our 85-year history of striving to increase big game herds, there is now a clear difference of opinion about how many is enough. We can look back for the first time in this century and say that most of the historic populations of mule deer, white-tailed deer, bighorn sheep, and mountain goats have been restored. Most of the lands now capable of supporting elk, moose, and black bear are currently inhabited by these animals.

Like it or not, we are leaving a period of dramatic big game population increases and entering a period of protecting and perpetuating what we have.

Proposed future strategies include upgrading population trend surveys, modeling populations, and improving our ability to determine allowable harvest rates.

Other efforts will be taken to: 1) complete long term species management plans; 2) complete wildlife management area plans; 3) enhance public participation in program development and management decisions; 4) develop more cooperative programs with public land management agencies; 5) maintain quality and diversity of hunting opportunities; 6) improve landowner/sportsmen relationships; and 7) obtaining access for hunting on private lands.

1989 ELK

Please record only YOUR OWN rifle and archery hunting activities in Montana during this past archery and general hunting season. (Sept. 2 - Nov. 26)

1. Did you HUNT Elk in Montana this past archery or general season? NO ☐ 1 YES ☐ 2

2. Please list all hunting districts (see map for 3 digit hunting district number) hunted for Elk and the total days hunted in each.

Hunting District Number	No. Days Hunted

3. Did you KILL an Elk? NO ☐ 1 YES ☐ 2

4. In which hunting district did you KILL your Elk? Hunting District

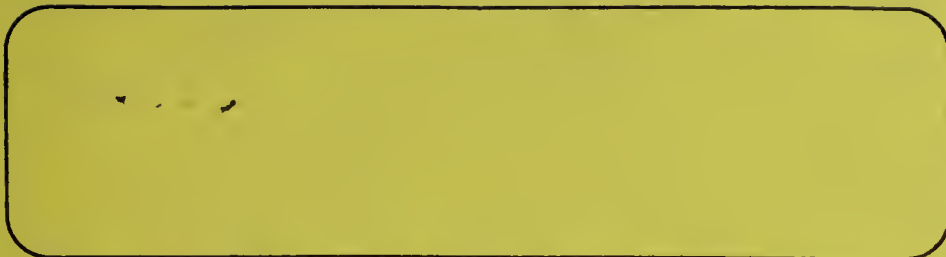

5. Elk killed was a: CALF ☐ 1 COW ☐ 2 BULL ☐ 3

5a.) If a bull, how many points on each side? X
(Points, including brow points are antler tips 1" long or longer. Spike bulls are 1x1) (Side 1) (Side 2)
